-  1) based on 280 standard cleaning cycles using cold water fill and the consumption of the low power modes. Actual energy consumption will depend on how the appliance is used.
- 2) based on 280 standard cleaning cycles. Actual water consumption will depend on how the appliance is used.
- 3) 'Standard programme' is the standard cleaning cycle which is suitable to clean normally soiled tableware, and that it is the most efficient programme in terms of combined energy and water consumption.
- 4) The wash time varies depending on the pressure and temperature of the supplied water.
